ULTIMATE SLIMMING AID

TYPICAL ANALYSIS PER CAPSULE

Hoodia Gordonii	300mg
Coleus Forskohlii	600mg
Chromium Polynicotinate	12% 1.7mg
Green Tea Extract	95% 50mg
Contains no preservatives	

HOODIA GORDINII

Safe and effective appetite suppressant that will not cause heart palpitations

GREEN TEA EXTRACT

Loaded with antioxidants and various substances that are highly beneficial for health.

The main antioxidant in green tea (EGCG) increases the hormone levels that tell fat cells to break down fat. The end result is that more broken down fat is released into the bloodstream and becomes available for use as energy. Exercise dramatically enhances this process.

DOSAGE

1 Capsule 2 x per day
Half an hour before meals with a glass of water

COLEUS FORSKOHLII

The active ingredient Forskolin increases your metabolic rate and cellular levels of an enzyme called cyclic adenosine monophosphate (cAMP). Elevated cAMP levels are associated with increased rates of fat loss, and can improve the effects of other fat burning compounds found in Nordens Ultimate Slimming Aid.

CHROMIUM POLYNICOTINATE

Plays a role in the metabolism of both carbohydrates and fats, it also assists in stabilizing sugar levels and carbohydrate cravings.

Chromium enhances insulin receptor sensitivity and is effective for obesity, diabetes, insulin resistance (hyperinsulinaemia/glucose intolerance) and post-meal fatigue
