### INTRODUCTION TO LASH COMPANY

Our lashes are made from soft and naturally curved synthetic silk protein, so they look and feel identical to human lashes. The use of the most advanced adhesives ensures the best possible bond to the natural lashes. This results in thicker, more natural looking lashes which last the life of the client's own eyelashes.

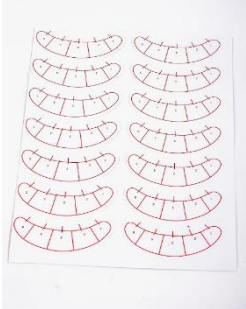

In addition to top quality lashes, we also supply affordable lashing tools and accessories required to perform a perfect lash extension.

Should you require further training on lash extensions, we provide in house training on our lash products, to ensure you achieve the best results. Training dates will be posted on our web site.
