

FACT SHEET

Supernova has been formulated as a synthetic wax to reduce pain, skin irritations & allergies and uses fewer applications leaving the skin silky smooth also reducing regrowth. Supernova wax is so easy to use and shortens the therapists waxing time in the salon. As Supernova is a synthetic wax the heat is reduced within seconds after application. The therapists must make sure that the wax is at a honey like consistency on application and can be removed between 30-60 seconds. Available as 8 x 125g bars in 1kg packs/tins

WAX RULES

Hot Film wax- Is thinly applied in the same direction as hair growth and removed in the opposite direction of hair growth. Supernova Hot Film Wax has 3 variants in the range.

Pink Pleiades (Pronounced as "play dees") Milky Way and Vortex Azure are applied in the same direction of hair growth. Wax heaters are always to be full to constantly regulate the temperature as a medium heat only. Available as 8 x 125 g bars in 1 kg packs.

Hot wax - Is thinly applied in the opposite direction as hair growth and removed in the opposite direction of hair growth. Supernova has 2 variants in the Hot wax range i.e. Green Nebula and Dark Matter the 1st Black wax on the African continent is applied in the opposite direction of hair growth and must also be at a medium heat only. It is removed between 30-60 seconds. Available as 8 x 125 g bars in 1 kg packs.
